

## NEWS FROM GBA'S ENVIRONMENTAL COMMITTEE

### Webcast: Phase I AAls and Due Diligence: Where Are We Now?

Catch up on how changes to ASTM E1527 will affect "Phase I" environmental site assessments, and the business opportunities presented by the continuing-obligations requirements for BFPPs with this session from the GBA 2013 Spring Meeting. Earn a Professional Development Hour (PDH), too! If your firm had someone at that meeting, this is absolutely free to you; if not, it's still only \$40 for members. Watch it today!

### Risky Language

Words can kill, especially when a professional uses the wrong words. This well-crafted Lunch & Learn seminar focuses on a variety of taboo and other words and phrases that geoprofessionals should avoid or use with utmost care, for their own sakes and the sakes of their firms.

## Manage Your Preferences

I wish to opt-in to the following special interest groups to receive e-mail from ASFE (applies to both members and non-members)

- Construction Materials Engineering and Testing
- Education
- Environmental
- Geotechnical

Help us build our list of environmental professionals! Send this to other people you know in the environmental field and encourage them to sign up for the GBA mailing list, whether they're members of GBA or not. Once they're on our list, they can select what news they want to receive from us.

## Revitalizing America's Mills: A Report on Brownfields Mill Projects

Creative communities throughout the United States have developed innovative approaches to revitalizing abandoned and potentially contaminated mills. A valuable reference for owners, developers, and consultants, this report relates case histories that chronicle some of the challenges faced and solutions found during the EPA-supported revitalization of more than 350 mill sites throughout the nation.
